This item is printed on demand - Print on Demand Neuware - Essay from the year 2005 in the subject Business economics - Economic Policy, grade: 1,0, University of Glamorgan (Business School), course: International Business and Export Management, 40 entries in the bibliography, language: English, abstract: Trade barriers are closely linked to, if not a direct consequence of, the practice of international trade. Thus, in order to present the context in which this paper will argue, it will start by introducing international trade as a branch of economics, briefly outline its history and contrast a number of common economic theories. Some of these advocate free multilateral trade as a means to generate greater welfare for all participants whereas others see trade barriers as a necessity. The historical and theoretical overview will lead to the description of today's status quo in international trade relations. Building upon the illustration of the triad's role in contemporary international business the study will turn towards the discussion of the implications of trade barriers in the triad communities and examine if their reduction would be beneficial or unfavourable. Thereto trade barriers in...

If you need to add benefit, a must buy book. Better than never, though I am quite late in starting to read this one. I discovered this publication from my dad and he advised me to find out.
