Level Set Methods and Fast Marching Methods: Evolving Interfaces in Computational Geometry, Fluid Mechanics, Computer Vision, and Materials Science (Paperback)

By J. A. Sethian

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2009.

Paperback. Book Condition: New. 2nd Revised edition. 226 x 140

mm. Language: English Brand New Book ***** Print on

Demand *****. This new edition of Professor Sethian's

successful text provides an introduction to level set methods

and fast marching methods, which are powerful numerical

techniques for analyzing and computing interface motion in a

host of settings. They rely on a fundamental shift in how one

views moving boundaries; rethinking the natural geometric

Lagrangian perspective and exchanging it for an Eulerian,

initial value partial differential equation perspective. For this

edition, the collection of applications provided in the text has

been expanded, including examples from physics, chemistry,

fluid mechanics, combustion, image processing, material

science, fabrication of microelectronic components, computer

vision, computer-aided design, and optimal control theory.

This book will be a useful resource for mathematicians, applied

scientists, practising engineers, computer graphic artists, and

anyone interested in the evolution of boundaries and

interfaces.

Reviews

This kind of pdf is every little thing and taught me to looking forward and more. It is one of the most incredible book i have read. You wont truly feel monotony at whenever you want of your time (that's what catalogs are for about should you check with me).

-- Miss Amelie Fritsch DVM

The ideal book i possibly read. It is among the most remarkable pdf i have go through. I am easily could get a enjoyment of reading through a created ebook.

-- Elise Wehner
